### The benefits of using digital signage:

- Powerful up-selling and cross-selling capabilities
- A customisable user experience
- A highly effective channel for communications
- Heightened brand perception
- Lower costs than traditional signage

# Innovative and portable digital signage solution, with wireless connectivity.

## Scheduling made easy

Users can schedule their playlists to suit their needs. Simply drag and drop the chosen playlist onto the calendar, pick the date for the campaign to run and adjust the length of time accordingly. Users can then choose to repeat the campaign at the same time each day, on certain days or not at all.

## Customise your campaign

Users can easily upload images and videos from their computer for use within their adverts. All text and media is adjustable and can be scaled and moved freely.

Animations can be applied to make adverts eye-catching.

## Connectivity on the go

Internet connection is optional in order to use Screenspace™. Download the free app for iOS & Android and start using Screenspace™ immediately. Users are able to edit and update adverts even where there's no WiFi network available. To find out more about Screenspace™ and Sharp professional displays please contact your dedicated Sharp Sales representative.

## Utilise playlists

Users can create playlists to ensure their advertisements run seamlessly throughout the day. Simply drag and drop saved adverts into the preferred order and adjust the timings of each segment.
